into the wonderful world of mathematics: Chapter: not a group (behind mathematical thinking: collection) on the same page find out who we are not a gang. also does not belong to the same class. that is to find out. For example. many squares and a circle. round and everyone not a group; not own movement. and the activities of their feet or wings not a group; bike and engine transport is not a partnership. Shape. color. growth environment. the number of . classification conditions. By clever game to get the kids to understand the classification. The categories are many. corresponding to the results would be different. it also allows the children learned that things can be viewed from a variety of angles. Chapter II: magic potion (behind the mathematical thinking: combination and separation) from the angels. unicorns and other fantasy things. to the pencil eraser. car wheels and other real things. let your children know combination extensive use in life. Then from the combination between the actual visible objects. extends to the combination between the combination of objects and colors. and the adjectives and nouns from the concrete to the abstract. the gradual deepening of children fully understand the significance of the combination. Finally. from the point of view of the reverse thinking about the importance of separation. Chapter III: order (mathematical ideas behind: ordinal and cardinal number. one-to-one correspondence) kids well some poker. but something that looks wrong. such as a six of hearts playing cards on the words 7 says 5 on the four plum poker . Think about how to change it? Next. take...
