LAP Lambert Academic Publishing Apr 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x6 mm. This item is printed on demand - Print on Demand Neuware - Despite all the scientific attempts that have been made until now, the monsoon has continued to be a complex system with many unresolved questions, perplexing and baffling at times. Many questions regarding its onset, strengthening, advance and revival from the break conditions have continued to be unresolved. Both spatial and temporal rainfall variability influences agricultural productivity and sustainability of a region. Recent analysis of rainfall over the Northern Hemispheric land areas since the mid-nineteenth century has indicated significant increase of rainfall in mid latitudes and concurrent decrease in low latitudes. The agro-climatic regional planning applied to agriculture and allied sector is essentially resource based planning wholly dependent on monsoon variability in India, with inherent spatial variability of monsoon rainfall, there would always be some areas of deficient rains even in the best monsoon years (some areas of flood even in worst monsoon). Truly, the Indian agriculture has been described as a great 'gamble in the monsoons'. 108 pp. Englisch.
