

Optical Defects in School Children: An Address Before the Massachusetts Teachers Association at Its Annual Meeting, October 17, 1868 (Classic Reprint)

Filesize: 3.01 MB

Reviews

This book may be worth buying. I have read and i am confident that i am going to planning to go through once more once again in the future. Its been written in an exceptionally easy way and it is simply soon after i finished reading this publication in which actually altered me, modify the way i believe.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Optical Defects in School Children: An Address Before the Massachusetts Teachers Association at Its Annual Meeting, October 17, 1868 I would show, also, that the threatened misfortunes must be averted through the intelligence and vigilance of teachers; since, in many instances, the pupil himself will make no complaint, but will even be unconscious of the dangers he is incurring till the mischief is beyond repair. Within a very few years, great advances have been made in a knowledge of the optical conditions necessary to perfect vision, and of the causes which disturb the normal exercise of this function. Till recently, much uncertainty existed as to whether the imperfect sight, or inability to use the eyes, frequently complained of, depended on optical defects or on organic structural changes. But the invention of the ophthalmoscope by means of which we are able to illuminate and explore the interior of the eye, has made it possible at once to detect the latter, besides aiding in determining the presence of the former. It shows, moreover, in certain cases, the co-existence of both these morbid conditions, and their mutual dependence. Not to trespass upon your patience, I leave out of question, in these remarks, such defects of sight as are due only to structural changes, - though many of these so far lessen the visual power as to allow of only moderate and cautious use of the eyes, - and shall ask your attention to some of the more common disturbances of the refractive and accommodative powers of the eye. The normal eye, when looking at distant objects, (such as are at or beyond eighteen or twenty feet from it,...
